

# Environmental Earth Sciences Volume 73, Issue 12, June 2015

## Thematic Issue: ISMAR8 China

Issue Editors: Xuan Zhao and Weiping Wang

ISSN: 1866-6280 (Print) 1866-6299 (Online)

1. Introductory editorial to Thematic Issue Xuan Zhao, Weiping Wang	Pages 7697-7698
2. Riverbed clogging experiments at potential river bank filtration sites along the Ping River, Chiang Mai, Thailand K. Pholkern, K. Srisuk, T. Grischek, M. Soares, S. Schäfer	Pages 7699-7709
3. Questioning the impact and sustainability of percolation tanks as aquifer recharge structures in semi-arid crystalline context A. Boisson, D. Villesseche, M. Baisset, J. Perrin	Pages 7711-7721
4. Enhancement of wadi recharge using dams coupled with aquifer storage and recovery wells Thomas M. Missimer, Weixing Guo, Robert G. Maliva	Pages 7723-7731
5. Microbiological risks of recycling urban stormwater via aquifers for various uses in Adelaide, Australia D. Page, D. Gonzalez, S. Torkzaban, S. Toze, J. Sidhu	Pages 7733-7737
6. The development, application and acceptance of environmental and health risk assessment methodology for MAR schemes in South Australia Peter Quentin Newland	Pages 7739-7745
7. Risk assessment frameworks for MAR schemes in the UK M. Nandha, M. Berry, B. Jefferson, P. Jeffrey	Pages 7747-7757
8. Advanced aquifer characterization for optimization of managed aquifer recharge Robert G. Maliva, Rolf Herrmann, Kapo Coulibaly	Pages 7759-7767
9. Hydrochemistry and stable isotopes during salinity ingress and refreshment in surface- and groundwater from the Arani–Koratallai (A–K) basin north of Chennai (India) C. Sprenger, S. Parimala Renganayaki, M. Schneider	Pages 7769-7780
10. Combination of MIEX® resin and ozonation for reduction of dissolved organic matter during aquifer recharge using municipal effluent Xue Zhang, Xuan Zhao, Yutuan Gao, Meng Zhang	Pages 7781-7787
11. Characterization of persistent dissolved organic matter in municipal effluents after ozonation and soil aquifer treatment Xue Zhang, Xuan Zhao, Meng Zhang	Pages 7789-7794
12. Reclaimed water quality during simulated ozone-managed aquifer recharge hybrid Min K. Yoon, Gary L. Amy	Pages 7795-7802
13. Simulated effects of aquifer heterogeneity on ASR system performance Weixing Guo, Kapo Coulibaly, Robert G. Maliva	Pages 7803-7809
14. A new model for forecasting total dissolved solids evolution using hydrodynamics parameters in regional deep confined aquifers of North China Plain Min Zhang, Mingyu Wang, Bo Liu, Changyuan Wan, Wei Li...	Pages 7811-7823
15. A historical overview of Geneva's artificial recharge system and its crisis management plans for future usage Gabriel de los Cobos	Pages 7825-7831
16. Trace element patterns in Dutch coastal dunes after 50 years of artificial recharge with Rhine River water Pieter J. Stuyfzand	Pages 7833-7849
17. Aquifer storage recovery: an ASR solution to saltwater intrusion at Hilton Head Island, South Carolina, USA R. David G. Pyne	Pages 7851-7859
