Dear Ladies and Gentlemen, dear MAR family, greetings!

Please find some news on MAR for 2021 January

Index:

International Symposium on Geofluids. July 2021

MAR is considered in the new book. The United Nations world water development report 2020: Water and climate change

ISARM 2021 International conference. Submission of Abstracts has been extended: 31 January 2021

NGWA USA. Current activities for your participation. Call for MAR case studies

46th IAH Congress, Brussels, Belgium. 6-10 September 201. MAR in topic 8

47th IAH Congress, Brazil. Parallel virtual events. WhatsApp group on “Aquifer Recharge Management”

Old publications on MAR (another drop of nostalgia…)

International Symposium on Geofluids. July 2021

On behalf of Judit Mádl-Szőnyi, Symposium Chair, and the Organising Committee of the International Symposium on Geofluids, a new update regarding the event has been recently informed.

In light of the COVID-19 pandemic situation, the Organizing Committee has decided to postpone the Symposium to 7-9 July 2021. To avoid any further reorganisation, we chose an online format for the Symposium.

Abstract submission, registration and all related information are being updated, posted and distributed.

Everyone is invited to attend the virtual International Symposium on Geofluids this year.

The planned topics of the symposium are as follows:

1. Managed aquifer recharge and sustainable water management
2. Geoenergy, thermal water and hydrocarbon systems
3. Natural contamination and hazards of geofluids
4. Paleo and recent hydrothermal mineralization and scaling processes
MAR is considered in the new book. The United Nations world water development report 2020: Water and climate change

A new publication has been recently released including MAR issues.
Corporate author: UNESCO World Water Assessment Programme
Language: English. Also available in: Français, Español
Year of publication: 2020. Licence type: CC BY-SA 3.0 IGO

ISARM 2021 International conference. Submission of Abstracts has been extended: 31 January 2021

ISARM 2021 is devoted to relating work of groundwater and transboundary aquifers. MAR issues are included in this conference.

More information is available at UNESCO-IHP website: https://en.unesco.org/conference/isarm2021

NGWA USA. Current activities for your participation. Call for MAR case studies

Increasing MAR is a key tool to help address the growing demand for water supplies in the United States and globally. NGWA seeks to identify case studies of MAR projects around the United States, as well as North America, for a Groundwater® journal MAR special publication in 2021. Click here for the background and nomination "expression of interest" form to submit your MAR project to be compiled in an MAR compendium.

Please submit your case study by January 31, 2021.
48th IAH Congress, Brussels, Belgium. 6-10 September 2021. MAR in topic 8

Managed aquifer recharge or MAR in all its forms (i.e. infiltration ponds, injection with wells, river bank infiltration, etc.) covers the purposeful recharge of water to aquifers and its recovery when needed. The technique is applied for purposes as optimizing the use of groundwater reserves, increasing groundwater storage, preserving water demand in times of stress such as drought, improving the water quality or for environmental benefit. For this session we solicit contributions on different aspects of managed aquifer recharge such as the applicability of MAR to manage groundwater reserves, design considerations and tests, water quality issues, field studies, the interaction with existing groundwater systems, long-term effects and clogging issues, and economics of MAR.

We are contacting organizers to host an IAH-MAR Commission plenary during the conference. The submission of abstracts is already open.

NEXT RELEASE

-Advances in the UNESCO-IHP-GRIPP book on 28 international MAR case-studies will be released shortly.
We are eager to see this publication on line!

...
And that’s all by now… please, keep reporting… (dinamar@tragsa.es)

Thank you very much for your kind attention

Best regards

Enrique Fernández Escalante of behalf of IAH MAR Commission co-chairs.
